Global Caché and Cebotics Sign Agreement

Cebotics HouseBot Software Connects to Common Household Devices Using GC-100 Network Adapter

Jacksonville, OR – May 30, 2006 – Global Caché, the award winning provider of IP-enabling products for homes and businesses, and Cebotics, the developer of home control solution, HouseBot, announced today they have signed a strategic alliance agreement providing the framework for the two companies to work closely together to ensure their products work seamlessly together.

Global Caché's products include the GC-100 Network Adapter, a flexible and easy to use hardware device connecting infrared (IR), serial (RS232), relay (contact closure) devices, and sensor input to a network. The GC-100 enables the use of network-based software to control and automate diverse devices throughout a home and business. In addition, Global Caché provides IR learning devices, sensors, and other connectivity products to connect previously unconnected systems to a network. Global Caché products are based upon open systems and accepted industry standards. Cebotic's HouseBot software is a home automation server that monitors and controls lights, appliances, A/V equipment, and other devices using customizable graphic interfaces for PCs, touchscreens, TVs, and PDAs.

"We're very pleased to be partnering with Cebotics and that they have chosen to support our Network Adapters," said Robin Ford, VP of Sales for Global Caché. "They have a good solid software product at an affordable price. That, combined with our hardware, creates a very powerful solution perfect for customers looking to automate their homes."

Scott Leonord, Cebotic CEO said, "We're so pleased with the feedback we've gotten from our customers that are using HouseBot with the GC-100. This agreement ensures that we will work closely with the folks at Global Caché to make sure our products work seamlessly together going forward."

Please visit Global Caché in Orlando, Florida at infoComm06 in booth 1249, June 7 through 9.

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides the GC-IRL IR Learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at www.globalcache.com or call us at 541-899-4800.

About Cebotics

Cebotics is the software provider of HouseBot, a home automation server that allows you to monitor and control your lights, appliances, A/V equipment, and other devices using customizable graphic interfaces for PCs, touchscreens, and PDAs. HouseBot provides wireless control and status of many standard home automation and control devices. It is expandable to incorporate new devices and custom hardware interfaces.
