**Global Caché and Aurora Multimedia Corp. Form Alliance**

*Partnership Provides Framework for Marketing and Delivering Complimentary Solutions to Control and Automation Markets*

**Orlando, FL and Jacksonville, OR – February 24, 2005** – (EHX Spring 2005 Booth #641) Global Caché, the award winning provider of products that enable technology in homes and businesses, and Aurora Multimedia, a leading non-proprietary control systems company, announced today they have signed a strategic alliance agreement. The agreement provides the framework for the two companies to work closely together to deliver and market products that address the fast-growing control and automation needs for both the residential and business markets.

Both companies provide network-ready solutions based upon open systems and accepted industry standards. Global Caché's GC-100 Network Adapter is designed to IP-enable existing hardware that otherwise could not be accessed over a network. In addition, Global Caché offers IR learning devices, sensors, receivers, and other network connectivity products.

Aurora Multimedia offers Web Access Control Interface (WACI) Systems, which include a built in web server and use Web Standard Programming Languages and off-the-shelf Web Authoring Tools to develop Dynamic Control Interface Screens. These devices, along with Aurora IBZ Series Touch Screens, and Aurora's advanced audio and video processors comprise a part of the highly adaptive Aurora product line.

Paul Harris, Aurora CEO, said of the partnership, "Since the inception of Aurora Multimedia, our focus has been on providing open systems, thus increasing the options to our dealers and clients. Our new partners at Global Caché have the same attitude. That's one of things that drew us to them, as well as the synergy between our product lines. This partnership is a testimonial to the power of employing open systems and industry standards, providing flexible solutions at affordable prices."

Walt Keller, Global Caché President, added, "We're very pleased to be partnering with Aurora Multimedia. Their superb line-up of control products and commitment to open systems makes them an excellent partner for Global Caché. As the residential and business control markets mature and evolve, alliances like this are invaluable, as they provide the assurance to the dealer and installer channel that our respective products are compatible, and that we are working together to deliver a broader spectrum of choices to offer their customer base."

Global Caché is hosting a manufacturer training class and exhibiting at EH Expo in Orlando, Florida. Please visit us in booth #641.

**About Global Caché, Inc.**

Global Caché manufactures state-of-the-art products that enable technology in homes and businesses. Our GC-100 Network Adapter provides the means for PC-based home automation and management software to access, control, and deliver services in a networked home to diverse and previously unconnected devices and appliances. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services or to place an order, visit online at [www.globalcache.com](http://www.globalcache.com) or call us at 541-899-4800.

**About Aurora Multimedia Corp.**

Founded in 1997 by veterans of the audiovisual industry, Aurora Multimedia uses state-of-the-art technologies to define the cutting edge. Since the introduction of its Non-Proprietary IP-based control systems and touch panels, Aurora Multimedia has become a dominant force in the control system market. Advanced audio and video processors with features such as audio delay compensation, scaling, multi-image rotation and dual/quad display processing add to the highly-adaptive, diversified product line. Aurora Multimedia provides solutions for a variety of global markets including government, education, security, hospitality, corporate and residential.
