Global Caché Announces Automated Outlet as New Residential Distributor

Automated Outlet, Focusing on Residential Systems, Now Selling Global Caché Networking Products

Jacksonville, OR USA – August 8, 2006 – Global Caché, the award winning provider of IP-enabling products for homes and businesses, and Automated Outlet, a Texas-based distributor of digital home control and automation products, announced today they have signed a distribution agreement allowing Automated Outlet to sell Global Caché networking products.

Global Caché's award-winning GC-100 Network Adapter is designed to IP-enable existing hardware, bringing Ethernet connectivity to equipment that otherwise could not be accessed over a network. The first of its kind, the GC-100 is an essential enabling piece, connecting networks to infrared (IR), serial (RS232), and digital I/O relay devices so they can be accessed and managed simply and inexpensively by network-based software. Additionally, Global Caché offers the award-winning GC-IRL IR Learner, general and full spectrum sensors, and other network connectivity products. Global Caché products are based upon open systems and accepted industry standards. Automated Outlet is focused on serving customers for all of their home automation, lighting, structured wiring, distributed audio, security, and training requirements.

“We’re pleased that Automated Outlet has chosen to sell our products,” said Wes Walton, Global Caché’s VP of Sales. “Their current product offering is very compatible with ours, and their focus on the emerging residential market is a perfect fit for us.”

“We’re excited to be selling Global Caché products,” said Martin Custer, Automated Outlet President. “The products are cost-effective, dependable, and versatile. We’re already seeing a lot of interest from our customer base.”

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked environment to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, sensors, and conversion cabling to connect previously unconnected systems to a network. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services or to place an order, visit online at www.globalcache.com or call us at 541-899-4800.
