HomeLogic and Global Caché Announce VAR Agreement

HomeLogic to Sell GC-100 Network Adapter with OneHome Solutions

Indianapolis, IN – August 8, 2005 – (CEDIA Expo 2005 Booth #1215 and Booth #67) Global Caché, a leading manufacturer of IP-enabling products, and HomeLogic, a provider of leading-edge home automation solutions, announced today they have signed an agreement allowing HomeLogic to integrate and sell Global Caché products with their OneHome™ family of control and automation solutions.

Based on an open architecture, HomeLogic's award-winning OneHome Entertainment and Control solution is comprised of an IP-controller, network head-end gear, and software that enables the integration of diverse systems from major manufacturers. Global Caché's GC-100 Network Adapter allows common household devices to be connected to a network, enabling them to be controlled via network-based software. In addition, Global Caché provides products for IR learning, IR-in, sensors, receivers, and connectivity over a network. Together, these products provide flexible, easy-to-use ways for homeowners to browse, select, start and control audio/video systems from touch screens, computers and IR remote devices.

Walt Keller, Global Caché President said, "One of the greatest challenges in the home automation market is integrating the diverse systems together in a simple and easy to use manner. HomeLogic has solved that problem with its **OneHome** product line. Now, with their integration of the GC-100, it's even easier to connect any IR, serial, or relay device to a network to be controlled by **OneHome**."

Buddy Duncan, Co-Founder of HomeLogic added, "Our intention has always been to make the job of automating and controlling the home as easy and cost-effective as possible. Providing seamless integration to the GC-100, and the ability to sell Global Caché products directly to our dealers and installers at a very competitive price is another reason to choose HomeLogic solutions."

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at www.globalcache.com or call us at 541-899-4800.
