**HomeSeer Expands Support for Global Caché Products
and Signs on as Value Added Reseller**

HomeSeer adds Functionality with IR-input Capability over a TCP/IP Network

Jacksonville, OR and Bedford NH – March 25, 2008 – Global Caché, a leading provider of connectivity products, and HomeSeer Technologies, a leading provider of home automation software, controllers and related services announced today that HomeSeer has expanded support of Global Caché products to include IR-input over a network, and they will begin selling Global Caché products as part of their total solution. HomeSeer will offer Global Caché's GC-100 Network Adapters, sensors, and IR receivers to provide TCP/IP connectivity to any IR, serial, or contact closure device. The integrated solution provides seamless control and access to previously stand-alone equipment including entertainment systems, lighting, and more.

HomeSeer Technologies is a leading manufacturer of home control systems, controllers and related services designed specifically for custom electronics installers and consumers. The company focuses on advancing the state of the art in home automation integration.

Global Caché's GC-100 Network Adapter physically connects diverse devices throughout a home and business to a network so they can be controlled, automated, and maintained by network-based software. Global Caché offers other connectivity products, including an IR Learner, IR receiver and sensors that can be connected to a network. Global Caché products are designed to work with other standards based products.

Mark Colegrove, Director of Sales and Marketing for HomeSeer said, "We're excited to be expanding our relationship with Global Caché. By including their products as part of our total solution we are able to provide even more versatility and features to our product offering. The added feature of receiving and sending IR codes over a network is frequently requested by HomeSeer customers."

Global Caché VP of Business Development, Robin Ford, concurs that the alliance is a good one. "HomeSeer is a well known and highly respected company, with great home control products," she said. "We're delighted they've

decided to offer our products directly to their channel and have fully implemented our IP-enabling capabilities. It's gratifying when a partner expands an existing relationship."

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for network-based automation and management software to access, control, and deliver services in a networked environment to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, sensors, receivers, and conversion cabling to connect previously unconnected systems to a network. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services or to place an order, visit online at www.globalcache.com or call us at 541.899.4800.
