Embedded Automation and mControl add support for Global Caché's GC-100 Network Adapter Series for IR control

Surrey, BC - November 9, 2005

Embedded Automation and Global Caché have partnered to simplify management of the digital home. Through the support of Global Caché's award-winning line of GC-100 Network Adapters, mControl is able to centralize the control of previously disparate home electronic equipment. This is all being demonstrated at Embedded Automation's booth (#158) at the Electronic House Expo (EHX), in Anaheim, CA from November 9 – 11, 2005.

"The marriage of mControl and the GC-100 provides the ability to listen for, act upon, and send out a variety of IR signals. This functionality allows users to easily manage their entire home through a single remote control. For example, one button press can turn on your home theatre system, start playing a DVD, and adjust your lighting to your movie setting", said Maury Lum, sales & marketing manager for Embedded Automation. "Whether you are using an integrated Windows Media Center Edition system or a remote computer running Windows XP, the networked nature of this technology allows local management of all electronic components."

Embedded Automation and Global Cache (page 2)

Robin Ford, VP Business Development at Global Caché stated that “we are pleased to be partnered with an organization like Embedded Automation that shares in the vision of further connecting the home with the home owner. mControl and a GC-100 provide this level of control to the home owner through seamless integration with Microsoft Windows Media Center.”

In conjunction with Global Caché IR support, mControl will be demonstrated controlling both Insteon lighting, D-Link security cameras, compatibility with media center extenders, and multi-client support. Beyond mControl, Embedded Automation will also showcase their other mHome products at EHX this week. mTheater, the custom media center PC with its A/V design will be the control center for the demo this week, illustrating its power and versatility.

About Global Caché, Inc

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. The award-winning GC-100 Network Adapter provide the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at www.globalcache.com or call us at 541-899-4800.
