**Global Caché and NuFactor, Tatung Canada Subsidiary, Announce Partnership**

*NuFactor, Tatung Canada's Newly Formed Digital Smart Home Company, will Resell Global Caché IP-Enabling Products as Part of their Digital Smart Home Solution*

**Las Vegas, NV – January 5, 2006** – (2006 International CES) Global Caché, the award winning provider of products that enable technology in homes and businesses, and NuFactor, the newly launched Tatung subsidiary focused on providing digital solutions for the home, announced today they have signed a Value Added Reseller (VAR) agreement, allowing NuFactor to launch Global Caché products as part of their smart home system.

Global Caché's products include the GC-100 Network Adapter, a flexible and easy to use hardware device connecting IR, serial and digital I/O (relay) devices to a network. The GC-100 addresses the growing number of homes with high-bandwidth Internet and networking capability, and enables the use of network-based software to control and automate diverse devices throughout the home. In addition, Global Caché provides IR learning devices, sensors, and conversion cabling to connect previously unconnected systems to a network. Global Caché products are based upon open systems and accepted industry standards.

NuFactor, a newly launched brand of Tatung Company, specializes in high performance home theaters, multi-room wireless or wire audio video, networked entertainment systems, communications, and home automation and security systems. With a full line of high end LCD and plasma TVs, personal hand-held audio video devices, digital media receiver, customized Media Center (MCE) PCs, touch panel and tablet PCs, NuFactor provides top quality products to improve the home and office environments at an affordable price.

“We're very excited to be partnering with NuFactor,” said Walt Keller, Global Caché President. “The fact that they have a multi-billion dollar worldwide organization like Tatung behind them is important and sends a message that this market is expanding rapidly. We're excited this alliance will open up opportunities for us in the US, Canada, and throughout the world.”

“We consider Global Cache’s Network Adapters an essential piece of our product offering and strategy,” said Edward Kuo, Tatung Canada President. “With our broad range of plasma, LCDTV, security, and other products, and the GC-100’s ability to connect all of them to a network, this is a powerful partnership. We’re really looking forward to working with the Global Caché team.”

#### **About Global Caché, Inc.**

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at [www.globalcache.com](http://www.globalcache.com) or call us at 541-899-4800.

#### **About NuFactor**

NuFactor, a Tatung Canada subsidiary, is a high end digital smart home solution provider including entertainment/home automation/security products based in the greater Toronto area, specializing in high performance home theaters, multi-room audio video, networked entertainment systems, communications, and home automation and security systems. We aim at offering our customers a high-end solution that meets each customer’s individual needs. With water transfer/UV finished LCD and plasma TVs, personal hand-held audio-video devices, customized media center PCs, touch panel, digital media receiver, and Tablet PCs, NuFactor provides unique top-quality products featuring easy configuration, significantly reduced programming, time saving, and flexible open-architecture-platform qualities. It is our commitment to improve the home and office environments of our customers at an affordable price.
